

PEDANIOS 27/1 FRG-CA

PEDANIOS 27/1 FRG-CA

Medicinal Cannabis

THC/CBD:	Approx. 27 % / < 1 %
Variety:	Hybrid Indica dominant
Cultivar:	Farm Gas (FRG)
Origin:	Canada (CA)
Unit:	10 g

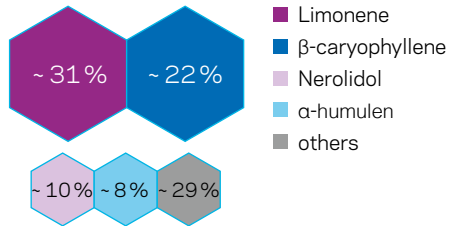

Strain description:

This strain has a characteristic pleasant aroma with fruity undertones which facilitates administration and increases patient adherence.

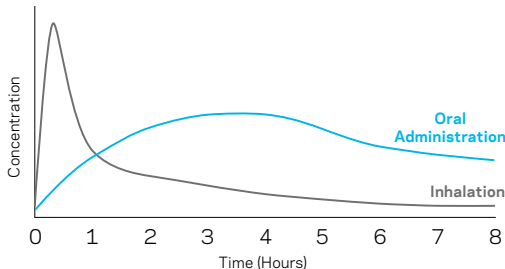

Its pain-relieving, anti-inflammatory, and anxiolytic properties are attributed to the main terpenes limonene and β -caryophyllene, which have a positive effect on sleep disorders, stress and depression.¹

Terpene profile:

Shown as a percentage of the total terpene content. Percentages are averages over multiple batches. High terpene content (~2.7%)

Plasma level of THC:

Blood plasma levels of THC after oral administration or inhalation intake [modified from source Grotenhermen 2003]²

Inhalation:

Onset after 2 – 8 min

Peak effect after 10 – 30 min

Duration: 2 – 3 h

Flowers with high THC content limit the negative effects of vaporisation, as patients need to consume less to achieve the desired effect.

TITRATION GUIDE

- There is currently no uniform starting dose for cannabis products nor uniform dosing information.
- Patients are recommended to slowly titrate to find their optimal dose for maximum therapeutic effects and minimal adverse effects.
- Timing of onset depends on mode of administration.

Onset and duration of effects for inhalation and oral administration³

	Inhalation	Oral administration
Onset of Effect	 Within seconds to minutes	 Within 30 minutes to 2 hours
Peak Effects	 Full effects peak within 30 minutes	 Full effects peak within 4 hours
Duration of Effect	 Up to 6 hours or longer	 Up to 12 hours or longer

Adverse events should be reported. Reporting forms and information can be found at:
