

# PEDANIOS 29/1 SRD-CA

## PEDANIOS 29/1 SRD-CA

Medicinal Cannabis

THC/CBD:	Approx. 29 % / < 1 %
Variety:	Indica
Cultivar:	Sourdough (SRD)
Origin:	Canada (CA)
Unit:	10 g

### Strain description:

Sourdough is cultivated according to the highest quality standards. The strain is hand dried and hand finished resulting in an exceptional product. The main terpenes limonene and  $\beta$ -caryophyllene have analgesic, anti-inflammatory, and anti-anxiety properties, which can have a positive effect on sleep disorders, stress and depression.<sup>1</sup>

### Terpene profile:

Shown as a percentage of the total terpene content. Percentages are averages over multiple batches.

### Plasma level of THC:

Blood plasma levels of THC after oral administration or inhalation intake [modified from source Grotenhermen 2003]<sup>2</sup>

### Inhalation:

Onset after 2 – 8 min  
Peak effect after 10 – 30 min  
Duration: 2 – 3 h

Flowers with high THC content limit the negative effects of vaporisation, as patients need to consume less to achieve the desired effect.

## TITRATION GUIDE

- There is currently no uniform starting dose for cannabis products nor uniform dosing information.
- Patients are recommended to slowly titrate to find their optimal dose for maximum therapeutic effects and minimal adverse effects.
- Timing of onset depends on mode of administration.

### Onset and duration of effects for inhalation and oral administration<sup>3</sup>

	Inhalation	Oral administration
Onset of Effect	 Within seconds to minutes	 Within 30 minutes to 2 hours
Peak Effects	 Full effects peak within 30 minutes	 Full effects peak within 4 hours
Duration of Effect	 Up to 6 hours or longer	 Up to 12 hours or longer

Adverse events should be reported. Reporting forms and information can be found at:
