

# Cannabis whole flower TILRAY INDICA

## Cultivar: Gorilla Glue

### Potency:

**25** THC **0** CBD

### Origin:

Gorilla Glue is an Indica dominant cultivar. It is created by breeding Chem's Sister, Sour Dubb and Chocolate Diesel.

### Terpene Profile:

Most commonly contains the following terpenes: caryophyllene, limonene, myrcene and linalool. A synergistic action of cannabinoids and terpenes have been suggested and may provide therapeutic benefits\*

### Therapeutic applications:

Gorilla Glue is suitable for patients experienced with THC containing products. Attention should be given to the safety profile of THC and to the patient selection criteria.

\* The presence of minor cannabinoids and terpenoids may vary by lot
