

AURORA 25/1 FLH-CA

25/1 FLH-CA

Medicinal Cannabis

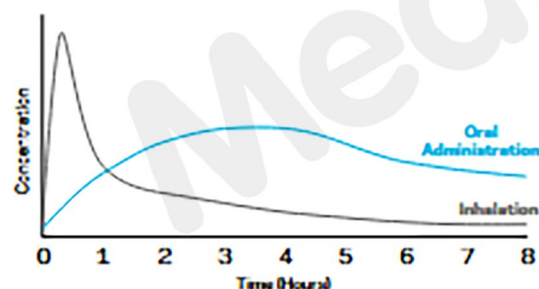

THC/CBD:	approx. 25 % THC < 1 % CBD
Dominance:	Sativa
Cultivar:	Frozen Lemon Haze
Genetics:	Jet Fuel White Mac
Origin:	Canada (CA)
Unit:	10 g

Strain description:

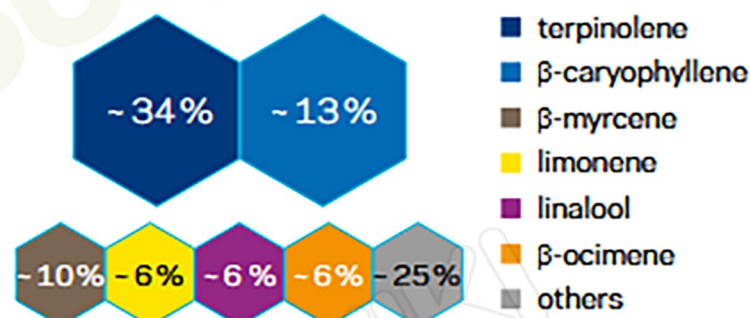

Frozen Lemon Haze, a pure sativa featuring frosty, colourful, conical buds is a hybrid derived from the Jet Fuel Gelato and White MAC lineages. Featuring a sweet citrus aroma with floral hints and undertones of gas and pine, this strain was developed at Aurora's world-class genetics cannabis research facility, Aurora Coast. The main terpenes include terpinolene, caryophyllene, and limonene, which may have anxiolytic, analgesic, and antioxidant properties.¹

Plasma level of THC:

Blood plasma levels of THC after oral administration or inhalation intake [modified from source Grotenhermen 2003]²

Terpene profile:

Inhalation:

Onset after 2 – 8 min
Peak effect after 10 – 30 min
Duration: 2 – 3 h

Using a vaporiser is a very efficient, fast-acting, and medically recommended form of administration. The optimal temperature setting is between 175 and 210°C.

Flowers with a high THC content limit the negative effects of vaporisation, as patients need to consume less to achieve the desired effect.
