## TITRATION GUIDE

- There currently is no uniform starting dose for cannabis products nor uniform dosing information.
- Patients are recommended to slowly titrate up to find their optimal dose for maximal therapeutic effects and minimal adverse effects.
- Timing of onset depends on mode of administration.

### Onset and duration of effects for inhalation and oral administration<sup>2</sup>

|                    | Inhalation                                                                                                            | Oral administration                                                                                                |
|--------------------|-----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
