ABOUT THE CULTIVATOR

Canna Amsterdam combines authentic Dutch heritage with advanced Swiss cultivation standards. Specialising in classic genetics, they utilise a meticulous small-batch approach where every plant is hand-watered, hang-dried, and hand-trimmed. This dedication to 100% biological processes and no pesticides, ensures a premium, terpene-rich flower crafted with genuine passion and care.

Aroma	Earthy, sweet, coffee/ chocolate	Lighting	High-efficiency full-spectrum LED lighting by Fluence
Taste	Earth, hashish, dark chocolate	CO2 Supplementation	Controlled enrichment to support plant performance
Appearance	Large and dense/ chunky deep green buds with hints of purple tones	Nutrient Strategy	Custom fertilizer blends tailored to each cultivar's genetic profile
Cultivation Method	Indoor	Pest Management	100% Biological Pest Management: / No sprays or chemical pesticides
Substrate	Coco	Drying Process	Hang-dried and carefully cured under controlled conditions
Irrigation	Watered by hand, with sensors in the growing substrate to monitor drying	Trimming:	Hand-trimmed
Environmental Control	Fully automated climate regulation ensuring optimal temperature and humidity
